

Do not change our law, adopt our law as federal law. Business that I deal with have the right to call me, when we are done with our business then I don't need to hear from them.
I like my home to be private. When I need to purchase an item I will contact these businesses. They don't need to call me at home 5 time a week trying to sell there product.
I get these calls at work, same company 3 or 4 times a week.
Trying to sell over priced advertising, over priced procducts. I don't need this aggerivation at home.
Also I have not heard about older people getting taken to the cleaners by "businesses" that harass them on the phone.
I didnt leave my name or address, again that is private.
